

Quest Reliant® Dry Granular with Managed Release Technology

All the benefits of foliar applied Reliant:

- Better germination
- Increased growth initiation of roots and shoots
- Fuller branching
- Better leaf color
- Increased leaf size
- Higher chlorophyll content
- Earlier bloom
- More intense bloom
- Better and larger fruit set
- Increased sugar content
- Higher yields
- Disease control

Additional Benefits of Granular Reliant:

- Uptake Efficiency of PO₃ is much better through roots
- "**Managed Release**" allows a constant phite supply available to roots
- Protects plants from soil borne Pythium and Phytophthora.
- No resistance issues
- Bulk density and size to fit fertilizer
- Can be placed directly on the seed or root ball with **no phytotoxicity**
- Works on newly seeded, transplant and mature crops, trees, etc
- Longer lasting than foliar applied phites
- Can be combined with fertilizer for soil application(save money and time)

Rate: 8 oz per tree
