

MAIN EVENT

Dual Carbon Soil Activator

0-0-3

Dual Carbon Soil Activator is a source of Humic and Fulvic Acids and complex Black Strap Molasses all in a convenient dry 100% water soluble form.

3 lb. bag packaged 10 bags to the case
Net Wt. 30 lbs.

MAIN EVENT Dual Carbon

Main Event Dual Carbon Soil Activator contains 2 proven carbon sources that have been shown to improve and increase soil health and tilth and to increase soil biology levels. Humic acid and Fulvic acid act as complexing chelating releasing agents for many ions in the soil. Black Strap Molasses has demonstrated to increase soil biota activity significantly aid in reducing thatch, increase plant vigor, release various soil nutrients. **Main Event Dual Carbon** contains both Humic/Fulvic acid and Black Strap Molasses in a 100% water soluble

Application Rates:
3 lb. per acre in 2 to 5 gallons of water every 14 days for best plant health, growth turf maintenance and thatch reduction. Dual Carbon is compatible with pesticide tank mixes but a jar test is recommended.

Best results are obtained if irrigation occurs after application.

Guaranteed Analysis

Total Potassium (K)..... 3.00%

Derived from: Potassium Hydroxide

Non-Plant food ingredients: Black Strap Molasses, a high carbon carbohydrate complex of complex and inverted sugar complexes. Humic and fulvic acid derived from young highly active Leonardite ore
